Caribbean Eco Homes

Concept

Our primary goal is to offer our clients an **eco-friendly and sustainable home & Caribbean lifestyle** they can afford and be proud of.

Our Eco Homes have environmentally low-impact, designed and built using materials and technology that reduces its carbon footprint and lowers its energy needs. Primarily **our houses** are designed and constructed **from recycled and restored** shipping containers incorporated with some concrete foundation and Mexican construction concepts.

Caribbean Eco Homes

Flexibility Concept

Caribbean Eco Homes can custom build your home to fit your needs and budget. From designing a singular module or multi modules the choice is yours. Our **additional modules**, extra bedroom, man cave, bathrooms, gyms, yoga rooms, lap pools, or whatever you can think of can be designed. This concept allows the consumer to **expand on their home when they can afford** or need more space. Caribbean Eco Homes can turn your vacations dreams into **reality for a fraction of the cost** of crowded condos or expensive villas.

Eco Concept

- Eco friendly
- Quick delivery
- Low maintenance
- Module additions
